FINSIGHT

AI-POWERED FINANCIAL DECISION ASSISTANT FOR PREDICTING PURCHASE IMPACT AND SMARTER SPENDING

Presented by

Fantastic 5

PROBLEM STATEMENT

1

Impulsive spending is increasing

- Easy access to online shopping & Buy Now, Pay Later (BNPL)
- Decisions made without financial awareness
- Short-term satisfaction, long-term consequences

2

Lack of financial decision guidance

- Budget apps only track past spending
- No tools to evaluate before buying
- Users don’t understand affordability or risk

3

No intelligent, personalized advice

- Raw numbers ≠ clear decisions
- No explanation or reasoning provided
- Users unsure whether to BUY, DELAY, or AVOID

SOLUTION OVERVIEW

FINSIGHT

An AI-powered system that helps users make smarter purchase decisions by simulating financial impact and providing clear, personalized recommendations.

SOLU
TIONS

Solution 1:
Simulate
financial impact

- Calculates cashflow
- Shows affordability
- Estimates recovery time

Solution 2:
AI decision engine

- BUY / DELAY / AVOID
- Explains reasoning
- Interprets financial risk

Solution 3:
Smart guidance

- Suggests alternatives
- Recommends timing
- Provides saving strategies

SOLUTIONS

SYSTEM ARCHITECTURE

FRONTEND

STREAMLIT (APP.PY)
USER INPUTS
VISUALIZATIONS

CORE LOGIC LAYER

ADVISOR.PY (DECISION)
SCORING.PY (RISK/SCORE)
SIMULATOR.PY (SCENARIOS)

AI LAYER

AI_EXPLAINER.PY
ILMU GLM API
OCR (RECEIPT SCANNING)

DATA LAYER

CLEANED_FINANCE_DATA.CSV
BENCHMARKS.PY

AI INTEGRATION

01

ILMU GLM 5.1 API for purchase advice

Returns structured JSON with summary, trade-off, alternatives and action plan based on real financial inputs

02

ILMU GLM 5.1 Vision API for receipt scanning

Sends base64 images to extract item name and price, with OCR as fallback

03

Multi-turn conversational advisor

Maintains chat history across API calls for contextual follow-up questions

04

Rule-based engine grounds the AI

Financial health score, peer benchmarks and savings scenarios computed before every API call

05

Malaysian-context system prompting

Every API call references local platforms like Shopee, Lazada, Maybank2u and EPF
